A Meeting to finalize the Curriculum of R-2019 for B.E. Computer Science and Engineering was convened in the Department of Computer Science and Engineering on 29.11.2018 (Thursday) at 2.00 P.M. in the Conference Hall, DCSE. However, the faculty members strongly urged the need to continue with the existing R-2018 regulation and curriculum for the following reasons:

The R-2018 regulation and curriculum was formed after a lot of deliberation with the several external experts and stakeholders. With so much of effort going towards it, and the fact we have not seen the impact of it still, it is just unfair on us to drop the whole thing. It is also very difficult for both academicians & administrators to follow different curriculum R-2015, R-2018, R-2019 to be in practice and it is unfair for the students. Hence, it was taken as a unanimous decision that the faculty of Computer Science and Engineering would like to follow R-2018 atleast until next regulation (R-2023).

Hence, a DCC was convened to discuss this issue. The DCC members unanimously felt the need for continuing with the existing R-2018 curriculum and strongly recommended that the existing R-2018 curriculum be followed until R-2023.
